PROFESSIONAL SUMMARY

Data Analyst with structured training in SQL, Power BI, Tableau, and Advanced Excel, complemented by real-world operations experience at Amazon. Delivered 3 end-to-end analytics projects spanning supply chain, manufacturing, and sales — covering data cleaning, KPI dashboard design, and automated reporting — while maintaining 100% data integrity. Combines SOP-driven process discipline with strong analytical and reporting accuracy. Seeking full-time Data Analyst roles where dashboard-driven insights support faster, better business decisions.

SKILLS

Technical Skills

- **Data Analysis & Visualization:** Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP)
- **Database Management:** SQL (Data Cleaning, Joins, Aggregations, Queries)
- **Reporting & Documentation:** MIS Reporting, KPI Dashboard Design, Business Reporting

Core Competencies & Operations

- **Domain Knowledge:** Supply Chain Management, Manufacturing Workflows, Sales Data Analysis
- **Operational Discipline:** SOPs, Process Optimization, Data Quality Assurance
- **Professional Skills:** Problem Solving, Cross-functional Communication, Requirement Gathering

PROFESSIONAL EXPERIENCE

Amazon | Hyderabad, India (Remote)
CS Associate – Data & Operations | (4 Months) Jul 2023 – Oct 2023

- **Data & Tool Mastery:** Used internal databases and CRM tools daily to track customer accounts, log service issues, and maintain accurate records across a high volume of customer interactions.
- **Metrics & Performance:** Consistently maintained strong customer satisfaction scores and met Service Level Agreement (SLA) targets across data entry, resolution speed, and quality benchmarks.
- **Root-Cause Analysis:** Investigated recurring customer issues to identify root causes, escalating systemic bugs to technical teams and improving resolution turnaround.
- **Process Compliance:** Followed strict SOPs for data security, customer privacy, and contact documentation.

PROJECTS

Data Analyst Training Projects — *ExcelR, in partnership with AI Variant | Remote* *Mar 2025 – Sep 2025*

Supply Chain & Inventory Analytics (GitHub)

Built an end-to-end SQL-based analytics pipeline on supply chain and inventory datasets, handling data cleaning, joins, and structural transformations to optimize tracking metrics and improve data reliability.

Manufacturing KPI Dashboard (GitHub)
Designed and deployed an interactive Power BI/Tableau dashboard to track manufacturing efficiency and streamline manual reporting.

Superstore Sales Analytics & Reporting (GitHub)
Analyzed the Superstore sales dataset in Advanced Excel, engineering data models to generate insights and automate weekly performance reporting.

Data Quality Assurance: Applied data cleaning, missing-value imputation, and validation checks across all 3 projects, achieving 100% data integrity.

EDUCATION

Master of Business Administration (MBA) — Vaagdevi College of Engineering 2024 – 2026
Bachelor of Commerce (Computer Applications) — Kakatiya Government College 2021 – 2024

CERTIFICATIONS

Data Analyst Certification — ExcelR, in partnership with AI Variant (View Certificate)
